HOW WE DO IT

Our industry-first SaaS technology was developed specifically to manage repossessions and remarketing. You can customize recovery solutions to complement your existing processes and procedures while also reducing internal costs and charge-off losses. **IBEAM (Internet-Based Electronic Asset Management)** is the preferred choice for financial institutions seeking streamlined processes and improved returns. IBEAM's capabilities give you a competitive advantage.

COMPLIANCE TRACKING

- Compliance scoring defined by risk factors
- Communication to driver ensures closes and holds are received quickly

INVOICE AUTOMATION

- Audit trail for all approvals and payments
- Contract price is audited by the portal
- Fee pre-approved by business rules (i.e.: flatbed or dolly)
- Integrates with accounting systems

REAL-TIME ANALYTICS

- KPI data reporting
- Compare performance and cost by supplier management to identify top performers

CLIENT CENTRIC

- Deep analytics allow for easy "what if" scenarios
- Portfolio analytics by geography to zip code and state level
- Automated placement strategy defined by client
- Holiday / Disaster bulk holds by state, county and zip code
